Yesterday, I read of the 'Green' proposal that Ameren has filed with you to be effective in June. My concern lies with the fluorescent bulbs that are part of their proposal. Many small communities do not offer any recycling program. Hence, we are going to have all these high-efficiency bulbs being thrown away in landfills. These bulbs contain mercury and according to the experts need to be disposed of through hazard waste measures. If you grant Ameren their request, I would implore you to mandate Ameren set up a disposal program throughout the state that would be fairly convenient for all citizens.

My grandkids thank you and my great grandkids will thank you!

Sincerely,

Bill LaDage
